Research Policy

A teacher working in Higher Education Institute needs to keep his/her knowledge updated in order to keep up with new challenges and developments in the educational field. Higher Education Institutes are expected to contribute more in quality research. Therefore, teachers in Higher Education are required to take up small and/or large-scale research projects and participate in research conferences, seminars, symposia etc. It is a need of the hour to involve in research activity at least to a short extent.

In order to contribute in nation building, the college has decided to foster research activities. Hence, under the guidance of IQAC, the college has developed general policy of research promotion. This policy is applicable to all the researchers of the college including teachers, administrative staff, non-teaching staff and students.

Institutional Responsibility and Activities:

1. The college will organize different activities to create research culture among the teachers and students.
2. The college will provide necessary infrastructure and ICT tools to encourage institutional research.
3. The college will take efforts to develop and support scientific temper among the teachers and the students.
4. The college will promote and support innovative ideas leading to Intellectual Property rights.
5. The college will encourage the students and teachers to involve in interdisciplinary research.
6. Official MoU and/or Linkages will be built up with other institutes or industries for research exposure.
7. More research-oriented books, journals, databases including e-copies will be made available in the library.
8. The college will provide the assisting seed money to the teachers going to participate in research seminars / conferences / workshops.
9. The college will encourage students to take up small scale research projects and participate in research related competitions like 'AVISHKAR' organized by the university.
10. The college will motivate the students to go to the research institutes and work under some eminent researcher or scientist so that they can develop interest for research in their future life too.
11. The concerned departments will try to incorporate student's research project, including internship, field project or any other type of innovative approach towards research to develop their interest in such activity.
12. Research ethics would be introduced to faculty members and the students to make sure they follow them.

Mechanism for Policy Implementation:

As per the guidelines of IQAC, the Research and Development Cell will take responsibility of the implementation of the research policy.
